

SUSTAINABLE energy solutions

Hydroflow Aquaklear W63

Specifically designed for swimming pool and private spa

Aquaklear is a unique water treatment device that subjects the water passing through the pipe work to electric fields causing particles to cluster. These clusters form a layer on the sand filter rather than penetrating it, which results in less cost, time and energy to maintain high standards required for the perfect spa.

- Saves water and energy by reducing backwash
- Improves water clarity
- Use 50% less chemicals
- Prevents algae build-up
- Eliminates odour & irritation associated with chlorine by-products
- Eliminates the need for coagulants/flocculants
- Reduces scum lines

The W63 fits pipe size of up to 60mm (2") outside diameter

3 years warranty
